

WORLD TOUR
2019

The Automation of Project Data

Josh Symonds
Regional Leader, Spatial & Data Engineering
Arup - Brisbane

PRESENTATION AGENDA

- | | |
|---|----------------------|
| 1 | Brief |
| 2 | Systems Architecture |
| 3 | Cool FME Stuff |
| 4 | Next Steps |
| 5 | Conclusion |

START

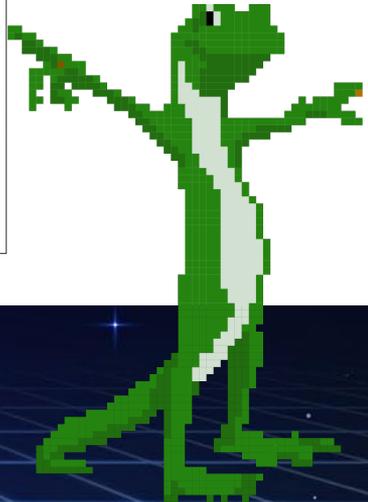

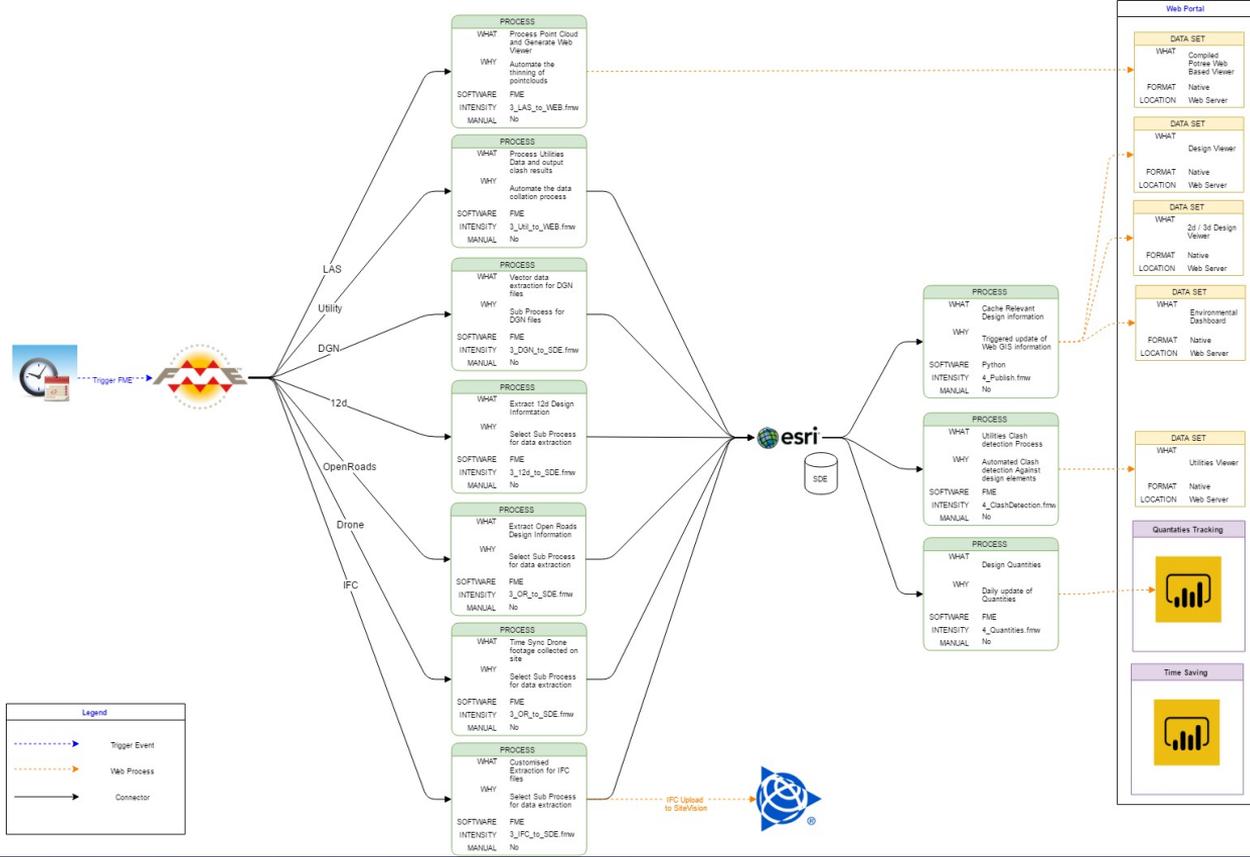

Brief Brief ...

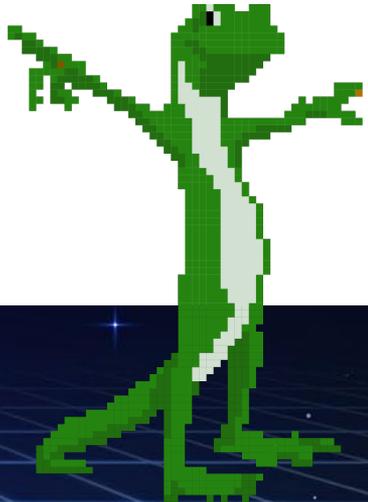

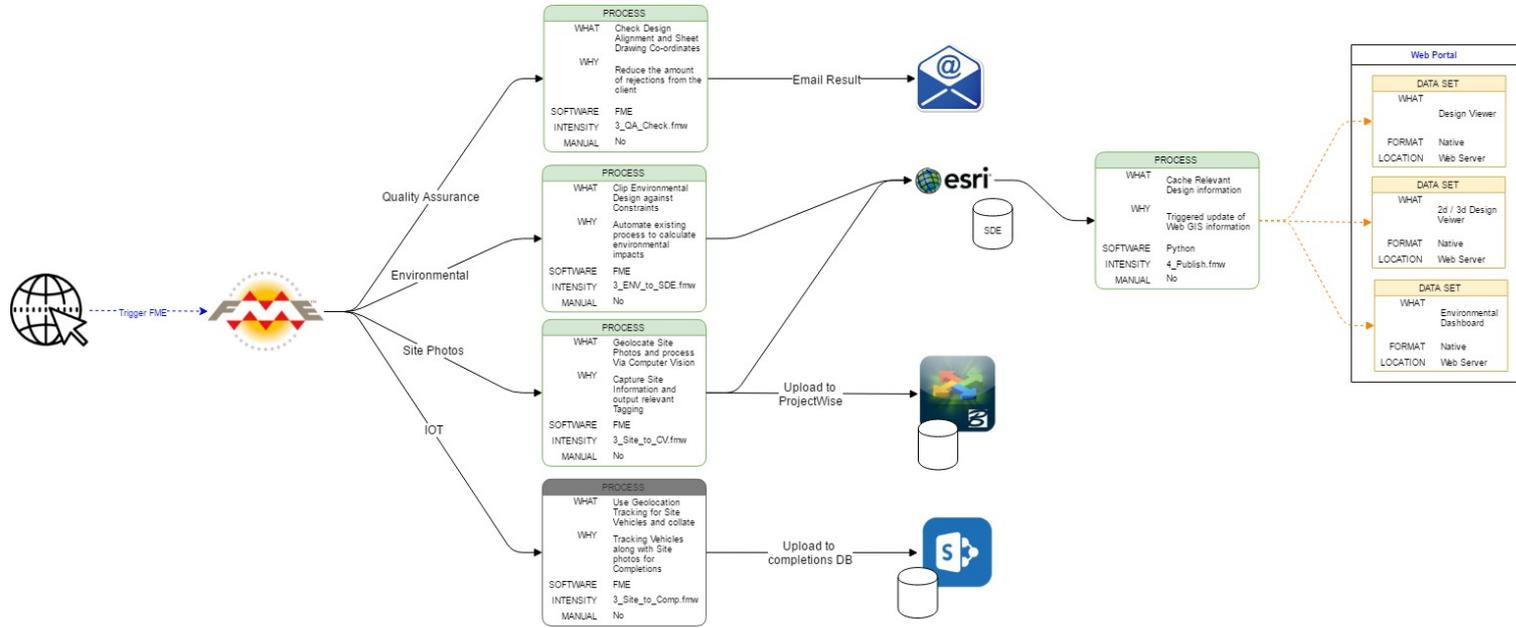

Do "Stuff" to support the project

Systems Architecture

“Static” Systems Architecture

"Dynamic" Systems Architecture

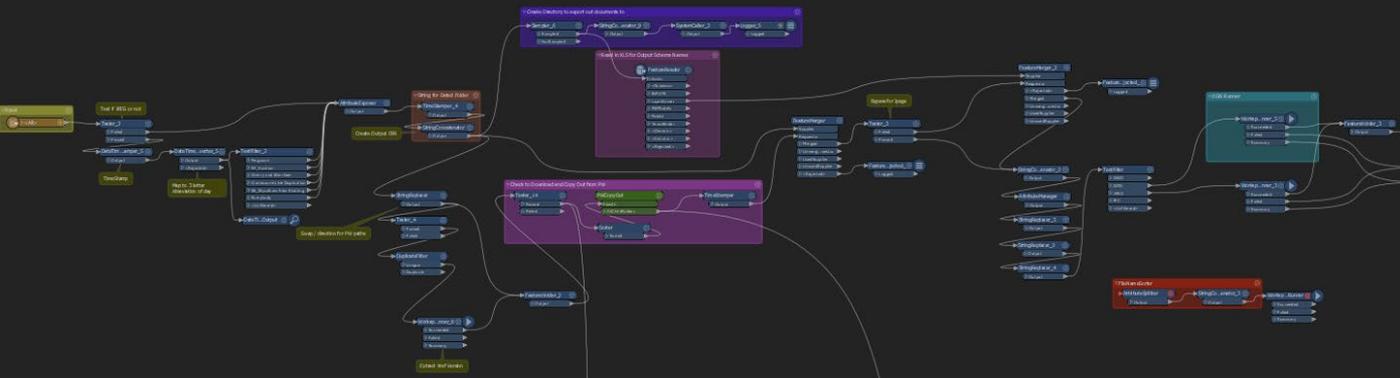

Cool FME Stuff

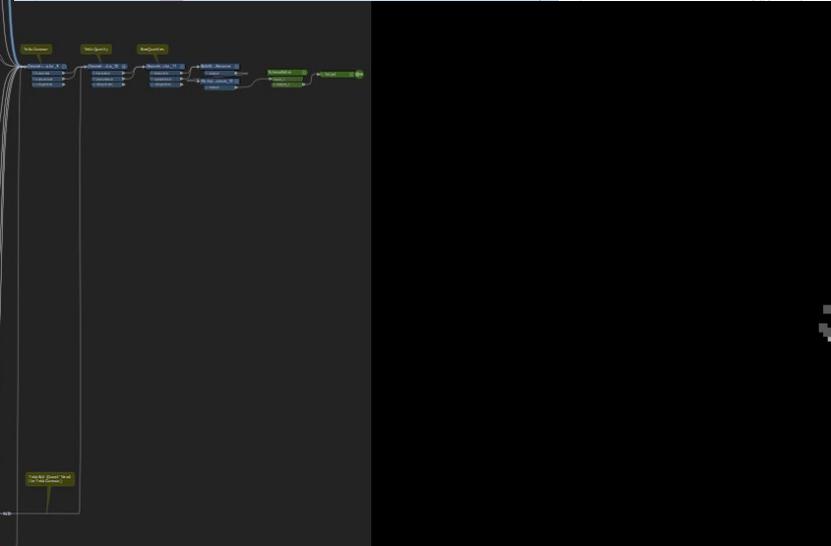

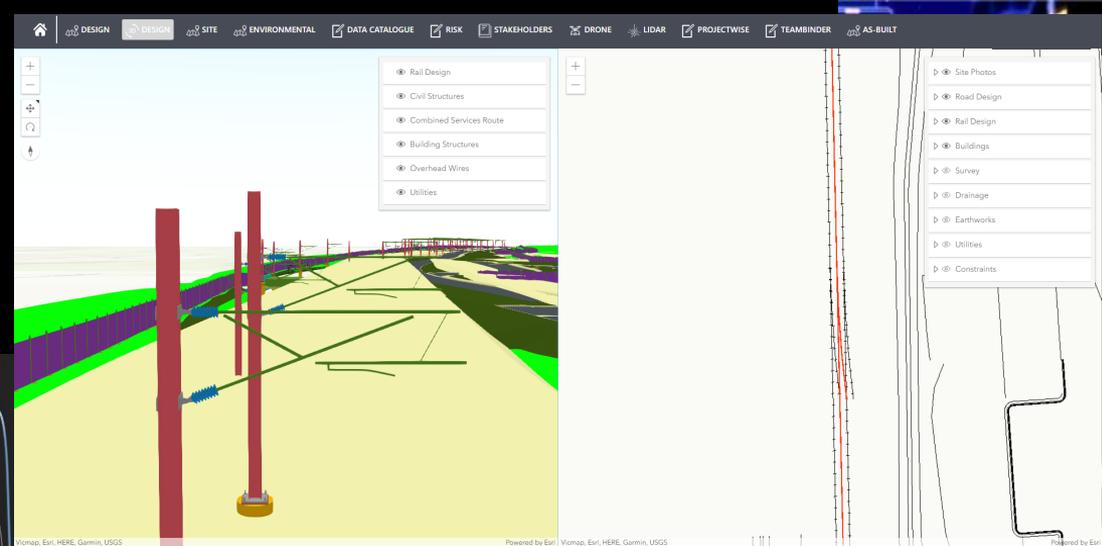

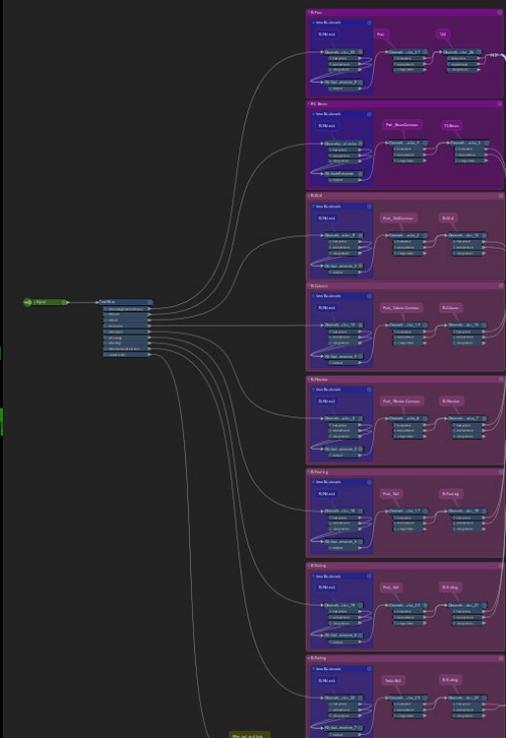

In no particular order *(Cause I'm Lazy)*

DE Metrics

Next Steps

- Integration with IOT, for Site Analysis;
 - Automated As-Constructed,
 - Generation of As-Built BIM,
- Further Design Analysis;
 - Design model progression analysis,
- FME Trigger integration with MS Flow;
- Develop more integrations for other design packages;
 - MS Project,
 - Tuflow,

Conclusions

- FME is like a “Lazy Gender neutral persons” automation script,
- Check FME Hub for awesome templates regularly,
- Trying to automate further, Identify workflows and map them prior to building FME (for once)
- Not have been possible without FME, 2 people supporting 4 projects and 500 staff,
- Version Control is critical,
- Remote working is rubbish,

Heaps more cool stuff, but too much to cram in!

THANK YOU!
