FME Integration Workshop – One Day Overview

Fast-track your team's FME proficiency with tailored, hands-on training.
This workshop is ideal for FME users and teams looking to build confidence and capability in data integration.

What You'll Learn

- Read and write from a wide range of spatial and non-spatial formats
- Convert data between formats, schemas, and coordinate systems
- Use transformers to clean, validate, and enrich your data

Build Powerful Data Workflows

- Design and run repeatable workflows in FME Form
- Use parameters for flexibility and automation
- Troubleshoot and optimise your processes

Solve Real-World Data Challenges

- Work through practical exercises relevant to your industry
- Apply FME best practices from experienced trainers

Workshop Features

- Instructor-led, full-day session
- Tailored examples using your own data (optional)
- Suitable for individuals or full teams
- Hands-on support and Q&A
- Optional follow-up consultation

Outcomes

By the end of the workshop, you'll be able to:
✔ Integrate and transform complex datasets
✔ Create automated workflows
✔ Reduce manual data handling
✔ Improve data quality and efficiency
