

Intermediate Data Solutions Specialist

Role: Full time

Location: New Zealand (Hybrid)

Job Posted: September 2025

Locus is seeking a dynamic, enthusiastic and experienced FME Professional to join our growing team of data solution consultants and FME professionals, based in our Newmarket, Auckland office.

As an Intermediate Data Solutions Specialist, you will work closely with our experienced FME Professionals to design, develop, and implement solutions using Safe Software's FME Platform for our wide range of clients.

This is an excellent opportunity for a seasoned professional who wants to further their career in the field of data management and integration.

Key Responsibilities

- Collaborate with senior consultants to understand project requirements and objectives
- Participate in the design and development of FME workflows to transform, integrate, and optimize geospatial and non-geospatial data from various sources
- Assist in the analysis of data transformation needs and provide input on the most effective use of FME capabilities
- Debug, troubleshoot and optimise FME workflows to ensure data accuracy and performance
- Contribute to the documentation of FME workflows, project processes and best practices
- Work closely with clients to gather requirements, understand challenges and provide technical support
- Deliver training sessions and workshops to clients on FME usage and techniques
- Keep up-to-date with the latest trends and developments in geospatial data integration and FME technology

Qualifications

- Tertiary qualification in Geography, Geomatics, Computer Science, Data Science or a related discipline is preferred
- Strong academic foundation in geospatial concepts, data manipulation and spatial analysis
- Familiarity with geospatial data formats (e.g., Shapefiles, GeoJSON, KML) and coordinate systems
- Understanding of ETL (Extract, Transform, Load) processes and data integration principles

- Minimum of 2 years' experience with the FME Platform
- FME Form / FME Flow Certified or a willingness to achieve certification
- Proficiency in programming languages such as Python or JavaScript is advantageous

Personal Attributes and Competences

- Excellent problem-solving skills and attention to detail
- Strong communication and interpersonal skills, with the ability to work effectively in a team environment
- Multi-tasker – can work on several projects simultaneously

Why Join Locus

Organisations are producing and consuming data at ever greater scales and the need to manage, manipulate, integrate and analyse data has become an everyday necessity.

With more than 15 years of experience in selling and supporting the FME Platform, Locus has an extensive client list across New Zealand covering a wide range of industries with diverse data challenges.

Working at Locus will provide

- Exposure to real-world geospatial data integration projects across diverse industries
- Personal growth working alongside experienced professionals who are passionate about sharing their knowledge
- Collaborative and inclusive work culture that values innovation and continuous learning
- Opportunities for career growth and advancement based on performance and skills development
- Access to cutting-edge tools and technologies
